Frequently Asked Questions

What privacy features are included with Indoor Cam?

Indoor Cam lets you disable motion recording and audio right from the app. Plus, you can also use the app to turn off motion alerts, so you don't get notifications while you walk around your home. You can also schedule your motion alerts to turn on at the same time you typically leave the house and turn off at the time you typically return.

What's Ring Protect?

Ring Protect is a comprehensive service that activates video recording and photo capture, saving and sharing for your Indoor Cam, plus a few extra perks. There are two tiers of Ring Protect: Basic and Plus. Without Ring Protect, you'll still receive real-time notifications when anyone comes to your door, and you can answer the notification to see, hear and speak to visitors in real time right from your mobile device.

Ring Protect Basic activates video recording and photo capture and sharing for individual Ring Doorbells and Cameras. It saves all your videos to your Ring account for up to 60 days (in the U.S.) and photos for up to 7 days, so you can review what you missed and share what's important. Ring Protect Basic subscriptions start at only \$3 a month and only covers one device.

Ring Protect Plus adds even more to your home security. It includes video recording, photo capture and sharing for unlimited Ring Doorbells and Cameras at your home, and it also comes with 24/7 professional monitoring⁷ with cellular backup for Ring Alarm, and more. Ring Protect Plus subscriptions start at only \$10 a month per home.
