

GP1704-2F SERIES HGU

The GP1704-2F series is a BDCOM-developed XPON series HGU product oriented for the FTTx market. With the latest Realtek chips, GP1704-2F Series supports route and bridge modes, triple play services (data, voice, and video), high-efficiency wireless transmission and high-performance throughput, making it enjoy great popularity once launched.

GP1704-2F-E

- 1GE + 1FE
- 300Mbps WiFi + Blade antenna

GP1704-2FV

- 1GE + 1FE
- 1POTS
- 300Mbps WiFi + Blade antenna

GP1704-2FC-S

- 1GE + 1FE
- 1 RF
- 300Mbps WiFi + Blade antenna

Highlights

- Self-adaption GPON/EPON
- Split ratio 1:128
- High-performance anti-interference 5dBi blade antenna
- Smart@CHIP energy-saving design
- Comply with mainstream security standards
- Open and compatible software architectures
- QoS & Firewall

Typical Application
