# BDCOM P5520 Series High-Density Rack-Mounted 10GEPON OLT

## Product Overview

BDCOM P5520 Series complies with IEEE802.3av and P.R.C intercommunication standard (YD/T 1475-2006) and supports CTC3.0. It can automatically discover and is compatible with ONUs of different manufacturers. It is also fully compatible with 1G EPON ONU. It can be used for establishing efficient 10GEPON solution.

BDCOM P5520 Series supports the downlink 10Gbps/ uplink10Gbps, 1.25Gbps PON transmission rate, efficient bandwidth usage and Ethernet services, helping carriers to provide reliable services to their users.

Its coupling ratio ups to 1:128, and its support of different hybrid ONU networks minimizes the carrier's investment.

With the edge-cutting technologies, BDCOM P5520 Series is strong in functions. A few of its functions such as QoS guarantee, SLA and DBA can be easily listed out.

P5520

## Product Characteristics

- EPON: P5520 Series abides by IEEE802.3av, PRC Community Industry Standard (YD/T 1475-2006) and China Telecom EPON technological requirement CTC3.0.
- System capacity: P5520 Series supports 8 10GEPON ports.
- Uplink interface: P5520 Series supports 4 GE optical ports, 4 GE Base-T ports, 4 10GE SFP+ ports.
- Dimensions (W×D×H): 1U, 300mm; the device occupies a small space.
- Trunk optical fiber protection: P5520 Series supports link automatic protection switching in case of optical fiber malfunctions;

- Power supply characteristics: P5520 Series supports dual AC, dual DC and AC/DC dual power supply. Its power supply adopts the modularized design and supports hot swap and EMC3 standard. Compared with the similar products, P5520 Series can be better adaptable to the environment.
