XPON Series

BDCOM GP6606 Series

LP66-16EPON-SFP Line Card

BDCOM GP6606 Series LP66-16EPON-SFP Line Card

Product Overview

BDCOM GP6606 series OLT is a multi-service bearer platform, providing EPON, GPON and 10GEPON access, and XGPON access can also be supported in the future. BDCOM GP6606 series OLT can support FTTH, FTTB, FTTC and POL networking methods, ensuring the integrated access of all services for home users and enterprises. BDCOM GP6606 series OLT can provide all services through a fiber optic network, which simplifies the network architecture, and greatly decreases operational expenditure (OPEX).

BDCOM GP6606 series consists of medium- and large-sized products to meet the needs of different application scenarios.

LP66-16EPON-SFP is one of GP6606 OLT EPON line card with 16 EPON SFP ports and 1 10GE SFP+ port, 7 Gigabit SFP ports.

BDCOM LP66-16EPON-SFP
