

Aqara Cube

The Aqara Cube is a smart wireless controller that recognizes multiple actions. Configure the Cube via app, and you can use it to control various smart accessories through linkage control.

Key Features:

- **6 Customizable Gestures/Controls.** You can assign each of the different actions of the Cube with a separate scene from the Aqara Home app and use it as an ultimate controller of your smart home system.
- **Highly Accurate Gesture Recognition:** Utilizing 6-axis sensor with accelerometer and gyroscope features, the Cube Controller is able to identify motion and position with high precision and accuracy.
- **Beautifully Designed to Fit Anywhere:** Take the cube with you and control all your Aqara devices from anywhere in the house.
- **Easy to Set Up in 2 Steps.** Just open the Aqara Home app, add the device to your Hub and it is ready to go.

Specifications:

Model: MFKZQ01LM

Dimensions: 45 × 45 × 45 mm (1.77 × 1.77 × 1.77 in.)

Wireless Protocol: Zigbee

Battery: CR2450

FCC ID: 2AKIT-MFKZQ01LM

IC: 22635-MFKZQ01LM
