Product Overview

BDCOM S3700 Series is a new generation of aggregation 10GE switches introduced by Shanghai Baud Data Communication Co., LTD. It is targeted at the IP MAN (metropolitan area network), campus networks and enterprise networks. It is developed on the basis of high performance hardware and BDROS - a software platform with BDCOM own independent intellectual property rights. It supports multiple services like IPv6, MPLS, VPN and network security based on L2/L3/L4 wire-speed switching service. It also supports nonstop upgrade, continuous forwarding, graceful restarting and redundancy protection.

BDCOM S3700 Series has 8 models: S3740, S3740F, 3756, S3756F, S3732P, S3756P, S3732M and S3756M. It supports 48 gigabit ports and 8 10GE ports.

Product Characteristics

Advanced Hardware Architecture and Industry-Leading Port Intensity

1U box-shaped switch with 48 GE ports and 8 10GE ports with high-performance ASIC switch chip; 64K MAC and 64K routing items.

Innovative Virtual Cluster Switching Technique

Innovative BVSS (BDCOM Virtual Switch System): virtualize multiple physical devices into one. The performance, reliability and management of the virtual system are superior to the physical ones;

Improved Performance: BVSS makes full use of each link in the physical devices, which avoids STP blocking the link and protects the original link to the maximum extent;

Product Characteristics

Innovative Virtual Cluster Switching Technique

Easy Management: BVSS realizes single IP management, greatly improving the networking efficiency and lowering the operating cost.
